## PROJECTS

- Talkify
  - Talkify is a full-stack real-time communication website with user authentication. It offers features like real-time video conferencing, audio calling and screen sharing with attractive UI using Socket.IO and WebSockets.
  - Built using MERN Stack (Mongo DB, Express, React, Node.js)
- Roomzy
  - Roomzy is a modern property rental website built using the MVC design pattern, featuring authentication and authorization for secure access. It integrates a map API to provide an interactive and intuitive experience for locating properties. With a user-friendly interface and powerful functionality.
  - Built using HTML, CSS, JavaScript, Bootstrap, Express and MongoDB.
- Weather App
  - A dynamic Weather App built using concepts of React and Node.js that provides real-time weather information for any location. The app features a sleek user interface, responsive design, and displays data such as temperature, humidity, and weather conditions with visually appealing icons and background changes based on weather. Perfect for staying updated on the go!
  - Built using React, HTML and CSS
